# ROSETTA

is not just another language learning application.
It is an application that **TALKS** to you.

imagine having a dedicated and fluent local friend that is willing to talk to you at any time about anything and is willing to listen and give feedback to each and every of your text

that's Rosetta! Don't believe me?
please see for yourself – Rosetta in action.

THE GRAMMAR AND VOCAB YOU USED IN YOUR RESPONSE IS CORRECT! HOWEVER IT WOULD BE MORE NATURAL TO SAY….

with accurate and personalised feedback, Rosetta provides just the advice i need to **IMPROVE !**

here's a translation of the relevant portion of the last few messages:

```
ChatBot: Did you travel anywhere recently? or did you try any new food
recently?

Me: I tried a new chicken rice

TutorBot: It would be more natural to say "I tried a new kind of chicken
rice" instead of "I tried a new chicken rice"
```

not all communicators have good days, but Rosetta understands

even if I try to be difficult with Rosetta, it takes my mood and turns it into **PRODUCTIVE ADVICE !** just think of how you can do that in real life with others....chances are you'll probably end up with less friends 🙂

despite my mood, the conversation went **AMAZING**, with Rosetta giving me thorough elaboration and perspectives!

oh, and yes! forgot to mention, since Rosetta knows me and my mistakes well (after we've been speaking), my messages to her now come with nice feedback, of which only i can choose to view or improve my messages upon

with fluency, productive advice and a **WHOLE LOT** of new perspective, talking to Rosetta could be the next step towards a world of

LANGUAGE MASTERY !

DON'T MISS OUT!
